Department of Software Engineering

STUDENT NAME:	**SHAHZAD AHMED AWAN**
STUDENT ROLL NO:	**2024-SE-15**
LAB:	**01**
COURSE TITLE:	**Computer Networks**
COURSE CODE:	**CS-2203**
INSTRUCTOR:	**Engr. Dr. Asma Javaid**
SUBMISSION DATE:	**04 March, 2026**

Lab 01: Installation of Cisco Packet Tracer

Introduction

This lab covers the installation and setup of Cisco Packet Tracer, a network simulation tool used for practicing network design and configuration.

Objective

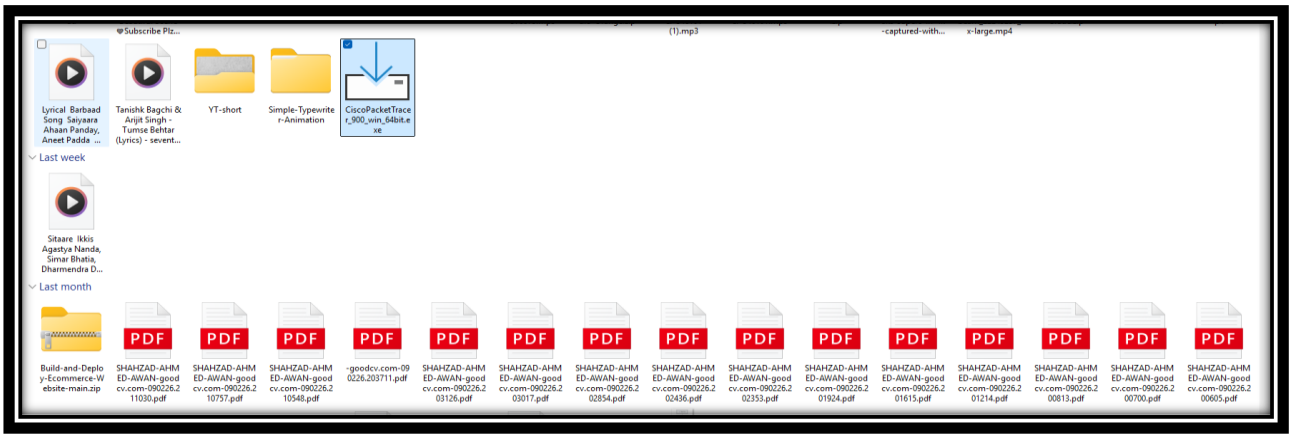
- Install Cisco Packet Tracer.
- Verify successful launch.
- Explore the basic interface.

Tools / Software

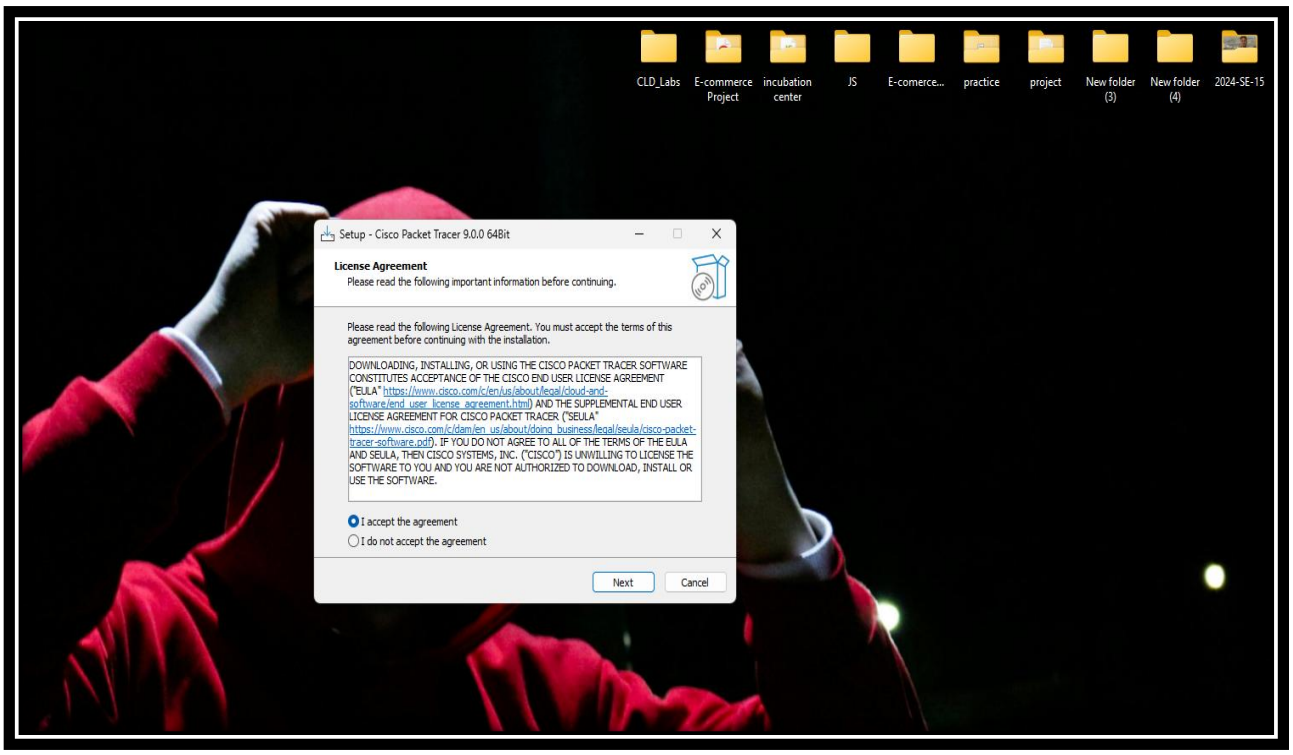
Item	Details
Software	Cisco Packet Tracer 8.x
OS	Windows 10/11
PC Specs	4GB+ RAM, 2GHz+ CPU

Procedure

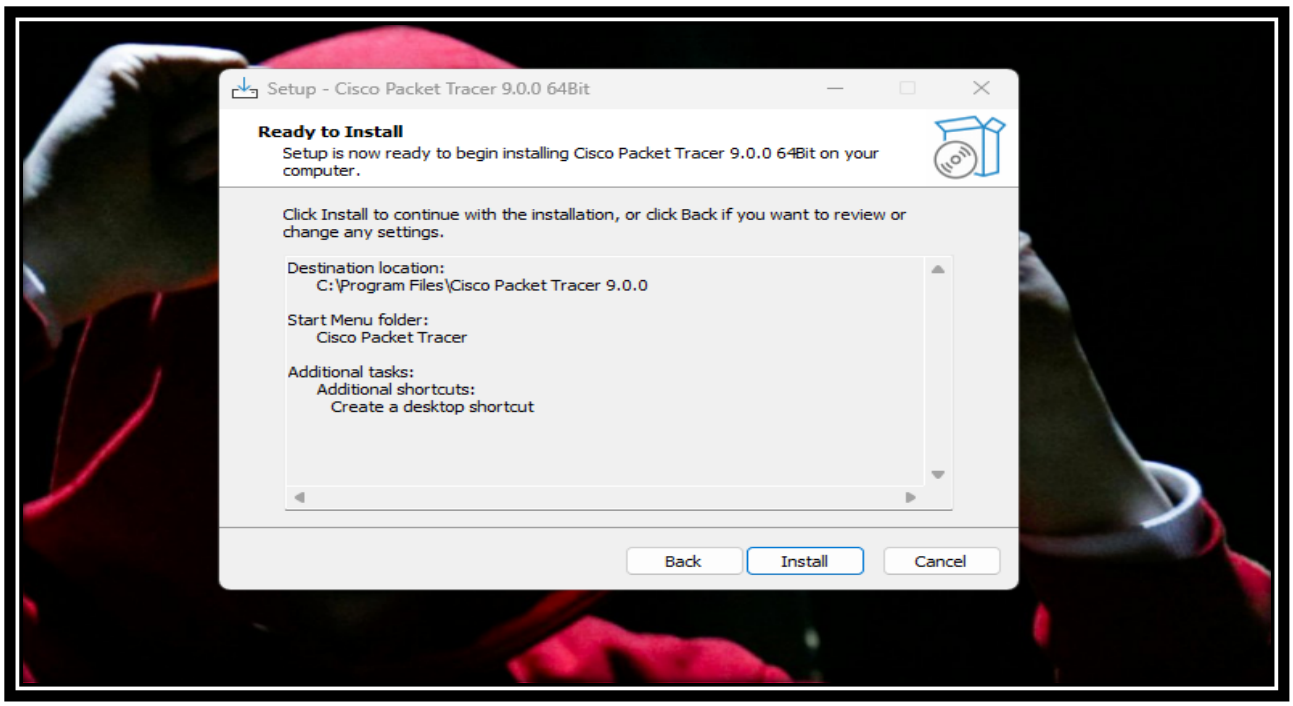
1. Download installer from Cisco Networking Academy.



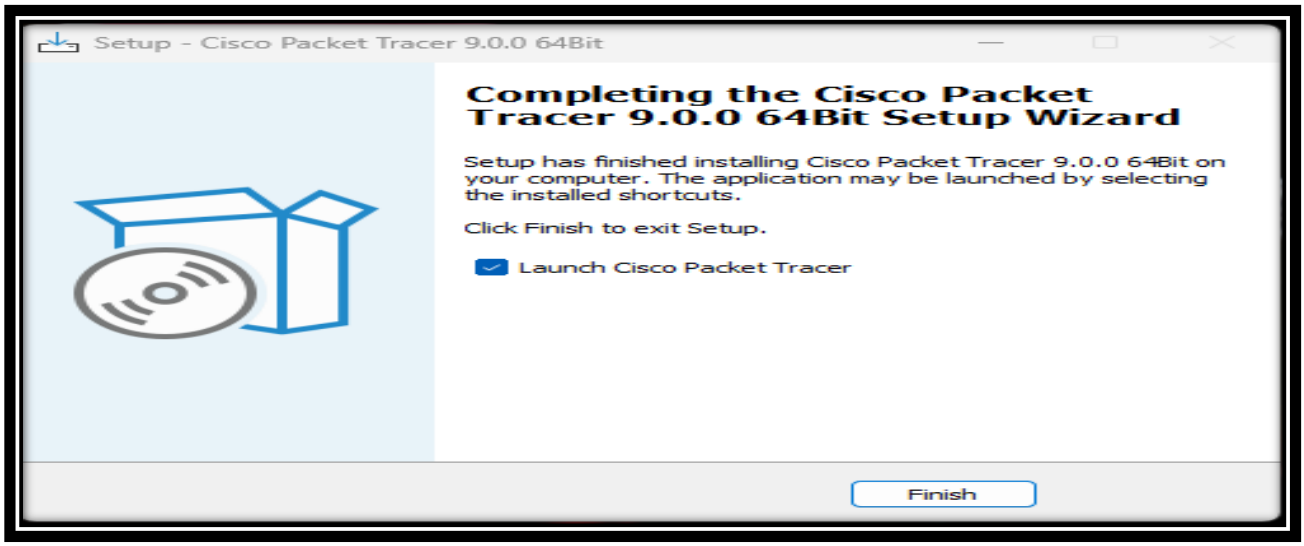
2. Run `.exe` and accept the agreement.



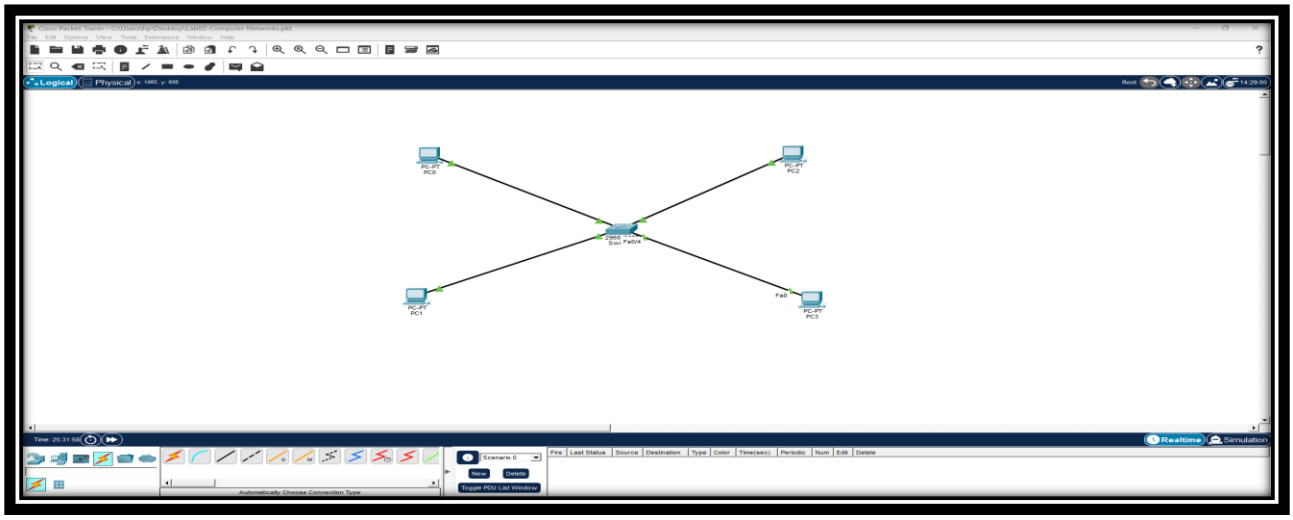
3. Select the Destination Location and click install.



4. Click on Finish and Launch the Application.



5. Explore interface: workspace, device types, toolbar, simulation panel.



Observations

- Installation completed successfully.
- Software launched without errors.
- All devices and tools accessible.

Conclusion

Cisco Packet Tracer installed and ready for use. Interface explored. Prepared for future network simulation labs.
